Insert the username and password provided, tick "Remember this password", Key in the "Connection name" as your reference. And click "Connect".

Connection will be established.

If login succeed, "The connection to the Internet is ready to use" screen will appear. You can close this.

If you want to re-establish the connection after disconnected, click the network logo on the bottom right, Click connect on the Connection name you created earlier.

A connection dialler will prompt out, Click "Connect".
